

Learning goals:

- *Students demonstrated an understanding of the working parts of a farm system (growing, harvesting, CSA, marketing and animal care) and applied this understanding to create meaningful writing for their community.
- *In support of their own health and continued personal growth, students had opportunities to grow and harvest their own food, and then cook dishes that incorporated these vegetables in the recipes.
- *By becoming environmental stewards, students had opportunities to build on their STEAM skills, become stronger readers and writers, and ultimately see the impact their work can have on the greater good of their communities.
- *Students strengthened their critical thinking skills and gain exposure to powerful informational writing and literature to build knowledge for their deliverables and overall learning.

Deliverables:

- 1) MagCloud Farm-azine Magazine
- 2) GROW YO GROW animated cartoons
